

FOR IMMEDIATE RELEASE:

**Global Medical Staffing Featured in Live Webcast
Sponsored by Intel and Dell**

***Early Adoption of Remote Technology Places Global Medical
in an Elite Group of Small Businesses***

Salt Lake City, Utah (June 12, 2009) – GLOBAL MEDICAL STAFFING (GMS) announced today that the company was featured as an early adopter of Intel and Dell-branded remote computing technology, which puts them in an elite group. The live webcast, "Hardware at Your Service," was sponsored by Dell and Intel and hosted by MSPmentor. It was a rare live opportunity for managed service providers (MSP) to hear from an MSP and their end-customer during the same conversation.

The event was hosted by Editorial Director of MSPmentor, Joe Panettieri, who called it a great event. Dan Stanford, CEO of Frontpoint and Managed Service Provider (MSP) for GMS presented his view, while Alan Lakomski, COO of GMS, presented the customer view. "It was rare indeed," said Panettieri. "Dozens of attendees had the opportunity to talk and ask questions about how their MSP partnerships and technology solutions really work."

GMS employs Intel's vPro™ and Dell Silverback technology for remote computer management to enhance its IT security and reduce time and cost of maintenance. Stanford recommended the upgrade to GMS and manages their system. "Dell's Silverback solutions and Intel's vPro technology combined allow for complete managed services value," said Stanford. "The resulting business

benefit for GMS is the ultimate competitive advantage. It can help reduce operating costs and increase user productivity, while enhancing network security,” added Stanford. “It can also help GMS avoid the escalating software and hardware support costs of older PCs while reducing system downtime.”

The webinar can be viewed online at:
